Featured Leaders Luciano!

Luciano has quickly established himself as a leader that is identified by his passion and drive. He has had exceptional success with MTI and continues to lead, train and support a big team within the organization. We are proud to introduce this leader to our members as a role model and inspiration that embodies our values.

It is all about MTI Values...

One of our core values at MTI is **PASSION**. MTI was not a mediocre idea, it remains a big dream with an even bigger vision and such a realisation is only possible with *passion*, a passion for people, a passion for Crypto and a passion for excellence. This passion has been visible in our members and management and a trait that sets us apart from competitors and other industries!

Bitcoin News

"The last month has been truly exciting for Bitcoin. We've seen negative news battle to shift the price down and then good news starting to pump the price. This is a clear sign of a bull market. We have been above \$10,000 for the longest period in history (including the 2017 run to \$19,666). We expect the price to continue up to new heights over the next 6-18 months!" - Andrew Caw, Coin Buyers Club

STELLENBOSCH OFFICE RELAUNCH COMING SOON!

new LIVE!

Meet our new COO, Charles Ward

Finding management that has extensive corporate experience coupled with a passion for crypto companies such as MTI is no easy task. Charles Ward has been in the corporate pharmaceutical industry for over 13 years as one of the youngest management level leaders in his field. He has a passion for structure, implementation and professional compliance and is a great attribution to the MTI management team.

What's new in the Back Office?

September was a month of introspection and re-enforcing of security of our back office management system. Our development and Programming team has employed ethical hackers to do some serious testing of our system following a security breach earlier this month. We are confident in our team, security and leadership and although we know attacks on administration systems are nothing new, we are dedicated to make sure our member's information is secure!

Four Fact BETWEEN 14/09 AND 13/10 MTI HAD 36,126 SUCCESSFUL WITHDRAWALS TO THE VALUE OF 6163 BITCOIN!

From the Support Team...

World Class Support! We are proud to announce that not only has our support team increased to keep up with member growth but the frequency of tickets created has drastically reduced in September 2020 with 9093 tickets resolved of which 56.4% was closed with one touch. This can be directly attributed to great first time response, member training and communications and excellent leadership from our members. Our support team has been formally trained and we continue to improve on service level and quality as we take MTI to the next level.

KYC Implementation

As MTI grows and becomes firmly established as a serious industry leader, our processes and systems need to grow too. We are excited about the KYC structure we are implementing for our members. We are focussed on making this a seamless process and will provide training, resources and time to members to adjust and KYC their individual accounts.

Individual commitment to a group effort--that is what makes a team work, a company work, a society work, a civilization work.

-Vince Lombardi.

Frequently asked questions

IS MTI GOING TO TRADE FOREX AGAIN IN THE FUTURE?

Nothing is impossible and we cannot say what we would be required to do in future but for now we at MTI are very happy with the CRYPTO trading and results. Until further notice MTI will be offering an exclusive CRYPTO trading service with an unregulated broker.

WILL WE SEE A 7 DAY TRADING WEEK?

Currently we are still testing the weekend markets with our BOT. It takes time as the CRYPTO market is far smaller than FOREX and weekends even quieter than week day trading. We will only enter a 7day trade week once we are 100% happy with our ability to trade profitably for our members over the weekend.

WHEN WILL MTI HAVE KYC STRUCTURES IN PLACE?

KYC (Know your client) will be active and running in October 2020. We have purchased a state of the art contract with a company that specialises in KYC, ensuring our member's details are safe and that no crucial documents are saved on our back office. KYC requirements will be simple and will include basic Identity verification (ID, Passport or birth certificate and for companies business registration proof).

WHAT IS THE STATUS ON MTI BEING INVESTIGATED BY REGULATORS?

MTI has attracted attention from regulators largely because of our growth and public profile. MTI has complied with regulators' demands and enquiries, sending them proof of trade (going so far as to physically show them LIVE trades and LIVE BTC balances and TXIDs of BTC being moved from our initial broker to our new broker on the 24th of July 2020) and all other relevant information barring our client's details. The regulators still claim to be in the process of their investigations. MTI, however have moved to an exclusive CRYPTO service and so placing us completely out of the regulator's limitations.

Your team is a reflection of your leadership.

With a **SOLID SERVICE** for people to create a **PASSIVE INCOME**, a **REFERRAL PROGRAM** was the natural choice to market MTI.

*The referral program is completely optional and does not affect trading earning in any way.
